HUSAN AULAKH

Software Engineer | Applied AI | Robotics

Vancouver, BC | husanaulakh5@gmail.com | github.com/husanaulakh
linkedin.com/in/husan-aulakh

PROFESSIONAL EXPERIENCE

Amazon | Software Development Engineer
Jul 2025 - Present

- Built regression-testing and deployment-safety tooling for large-scale engineering workflows.
- Developed distributed backend services and automation with AWS technologies.

UBC Agrobot | AI Lead / Machine Learning Engineer
Sep 2023 - Present

- Led a student ML division with 20+ contributors working on agricultural robotics perception.
- Trained maize-detection computer vision models and integrated real-time C++ inference on Jetson Orin.

Novarc Technologies | Machine Learning Developer Intern
Apr - Aug 2024

- Adapted DINO and SegFormer computer vision models for robotic welding quality workflows.
- Collaborated with robotics engineers and developed reusable model training and testing workflows.

Cyberium Group | Software Engineer Intern
Sep - Dec 2023

- Built an AI-assisted cybersecurity compliance application with a containerized API and web interface.

SELECTED TECHNICAL PROJECTS

Lexli | Tutor-led literacy tools
Open source

- Modular, accessible browser-based learning activities with a reusable lesson builder and offline-friendly design.

3D Similarity Capstone | UBC
Engineering capstone

- Created Python/Blender pipelines for rendering and processing 3D assets for machine-learning similarity analysis.

EDUCATION

University of British Columbia | BASc, Engineering Physics
2020 - 2025

SKILLS

Languages:	Python, C++, Java, JavaScript, TypeScript, SQL, MATLAB
Machine learning:	PyTorch, TensorFlow, OpenCV, computer vision, model evaluation
Systems & tools:	AWS, Docker, Git, Linux, ROS/Gazebo, Next.js, data pipelines
